ELECTRICAL SYSTEM		MAIN COMPONENTS	
Motor	Brushless 200W hub motor	Frame	Aluminium alloy
Battery	36V/10Ah Lithium ion	Rim and tyres	20"x 2.125, KENDA
PAS	1:1 pedal assistant system	Front fork	Suspension
Controller	36V intelligent PAS, brushless	Front brake	Disc
Charger	100V-240V, 2 amps smart charger	Rear brake	Caliper
	Maximum charge time: 5 hours	Gears	SHIMANO 6 speed gears
Throttle	Twist intelligent speed control	Accessories	Basket, speedo
PERFORMANCE			
Max.speed	35km/h	Max load	100KGS
Range	35km - 50km	Weight	22kg

The folding electric bicycle is easy to store inside residential properties. The battery is easily removed so as to prevent theft and allow it to be easily recharged

It takes approximately 1 minute to unfasten the securing bolt on the frame of the bicycle and fold it to a convenient size for storage or transport. The battery and motor do add to the weight of the bicycle but it can still easily be lifted and placed in an automobile by nearly most adults.
